

# SAT/SBT DOCUMENTATION & DATA COLLECTION SURVEY

This survey has been developed by the Critical Care BC (CCBC) team to gather your insights on SAT/SBT Documentation and Data Collection. Your input is essential as we work to improve how we document and use data related to Spontaneous Awakening Trials (SAT) and Spontaneous Breathing Trials (SBT) across the province.

This initiative is part of a broader provincial focus on the ICU Liberation Bundle and is aimed at improving the quality of care in critical care settings. Your feedback will directly support quality improvement efforts that enhance patient outcomes and experiences.

Please note: This survey is for quality improvement purposes only and is not intended for research. Do not include any personal information in your responses. If you have any questions about the survey, please contact the CCBC team at [CriticalCareBC@phsa.ca](mailto:CriticalCareBC@phsa.ca)

Thank you for your time.
