By default, the most recent fill for each medication is shown. Uncheck **Grouped by Generic Name** to show previous prescriptions.

Results can be sorted by clicking column headers: Date, Quantity, Status, Medication Name, DIN, Prescribed By.

Click **View previous prescriptions** to show previous dispenses of the medication.

Clicking **Print** will print the patient's PharmaNet profile including any filters that were applied. If the **Grouped by Medication Name** option was selected, the printout will still show all the dispenses within the specified timeframe (i.e. not just the most recent dispenses).
