

CST CERNER STUDENT TRAINING UPDATE

Fall 2020

With new CST go-live dates fast approaching, we are happy to share the latest updates on CST Cerner student training. Through this collaboration, we want to ensure students are supported and successful in their documentation within the electronic health record.

NEW COVID-19 EDUCATION STRATEGY FOR STUDENTS

Due to COVID-19, the training strategy has shifted to no longer include in-person classroom training; instead, students will only be required to complete online learning in order to get access to the CST Cerner system. This approach came into effect in **mid-March, 2020**.

The students and clinical instructors will continue to be enrolled into the online curriculum by the CST Learning team. To support this, **student names must be entered in HSPnet four weeks prior to the start of placement**.

DOCUMENTATION IN CST CERNER FOR ADDITIONAL ALLIED HEALTH PROFESSIONALS AT LGH & SGH (INPATIENT)

On July 14, 2020, additional allied health professions began documenting in the CST Cerner system. **Occupational Therapists, Physical Therapists, Speech Language Pathologists, Rehab Assistants, Aboriginal/Indigenous Health, Ethicists, and Music/Art Therapists** have been educated to start documenting with an expectation that the respective students will do the same.

Student names have to be entered in HSPnet **four weeks prior** to the start of the semester and the CST Learning Team will then register students in the required eLearning curriculum. Completion of the training is required for students to document in the electronic health record.

GO-LIVE DATES FOR PROVIDENCE HEALTH CARE

The goal is to implement CST Cerner at approximately 5-8 ambulatory clinics every 8 weeks for the remainder of 2020. The first cycle is set to go live on **August 31, 2020** and will include: SPH's Brief Intervention Clinic (BIC), SPH Reproductive Psychiatry, SPH Neuropsychology and SPH Cardiology Clinics (Burrard and Davie).

Youville (tertiary mental health and long-term care) and Langara (tertiary mental health), St. John Hospice, and Honoria Conway will go live on **September 13, 2020**

GO-LIVE DATE FOR HEARTWOOD CENTRE FOR WOMEN

The Heartwood Centre for Women is scheduled to go live with CST Cerner on **September 13, 2020**.
