

WEAR GLOVES THE RIGHT WAY!

Wearing gloves is **NOT** a substitute for Hand Hygiene

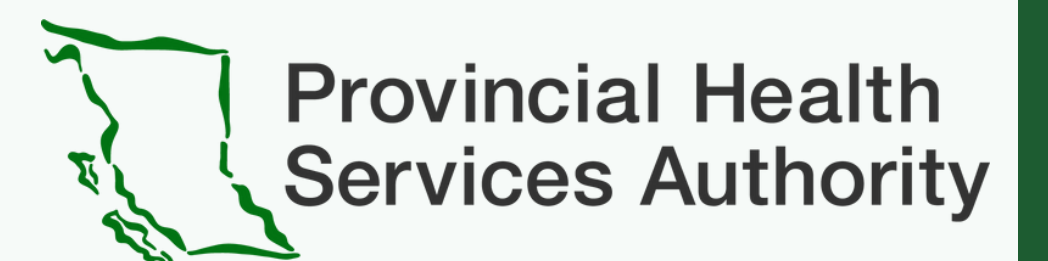

Always perform hand hygiene before donning **AND** after doffing gloves.

Hand hygiene should **NOT** be done on top of gloves.

Improper doffing of gloves **risks** contamination of hands

Change gloves **between** patients*, healthcare activities, or when entering the healthcare environment.

*Patient: an adult, mature minor, or a minor, who is receiving health care services at PHSA as an Inpatient or Outpatient, or who is participating in a Research Ethics Board (REB) approved research study. It can be used interchangeably with the terms 'client' or 'resident'.
