Addressing Physician Shortages in Mid-Sized Hospitals: Hybrid Model of Care Project

E-Health Presentation: June 2, 2025

We acknowledge with gratitude that we are gathered on traditional, ancestral and unceded territories of the First Peoples of British Columbia, who have cared for and nurtured the lands and waters around us for all time.

We give thanks, as Occupiers, for the opportunity to live, work and support care here.

Problem Summary

2024 Hospital Service Interruption Data

of service interruptions: **710**
(395* d/t physician)

of projected service interruptions in Q1 2025: **291**
(90% projected to be mitigated)

Problem Summary

5 emergency rooms close in B.C. Interior over long weekend

All but 1 have since reopened, with Nicola Valley Hospital set to resume services Monday morning

CBC News · Posted: Sep 01, 2024 8:15 PM PDT | Last Updated: September 1, 2024

The Nicola Valley Hospital, the only hospital in Merritt, B.C., was closed on Sunday. Four other hospitals in B.C.'s interior paused emergency services over the long weekend. (Interior Health)

More than 1,400 hospital ER closures 'damning indictment' of B.C. Health: Opposition

B.C. Conservatives take aim at the status of health care in rural B.C.

CARIBOO MEMORIAL CLOSURE

By Aaron Schulze

Emergency department Cariboo Memorial Hospital temporarily closed for seventh time in 2024

Rallies call attention to ER closures plaguing northern B.C.

Health minister says the province is hiring health-care workers at unprecedented rates, working with MLAs

Bridget Stringer-Holden · CBC News · Posted: Jul 29, 2024 9:38 PM PDT | Last Updated: July 29, 2024

Dozens attended a rally in Fort Nelson, B.C., on Monday, as northeast B.C. grapples with a series of emergency room closures this summer. (Submitted by Dan Davies)

Service Interruption Provider/Patient Impacts

Interior Health

BRITISH COLUMBIA
Ministry of
Health

7

- ❖ Ensure transportation resources & coordination of transfer
- ❖ Support family travel

3 hours each way

- ❖ Identify sites with capacity to receive next admitted patient
- ❖ Exhaust all staffing opportunities to remain open

1 hour each way

3.5 hours each way

- ❖ Repatriation efforts in reverse to return

- ❖ Activate extensive communication of service interruption
- ❖ Lock doors

1 hour each way

Mitigation Strategies

Vision

Enabling equitable local access to quality health-care for all citizens of BC through virtual care.

Virtual MRP Principles

Virtual care
complements
in-person care

Strengthen &
support
quality
patient care

Equity &
access to care

Culturally safe

High-quality
patient-
centered care

Complementary
to existing
virtual care
services

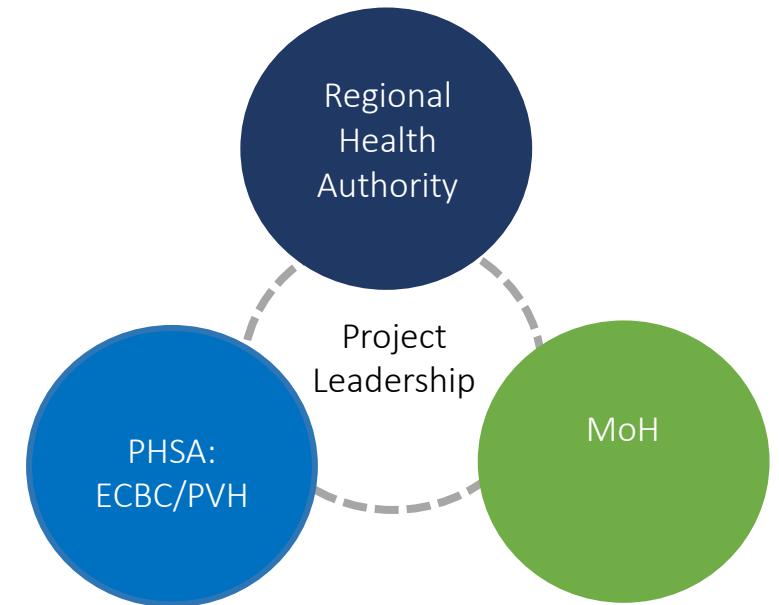

Improve
provider
experience

Project Collaboration Model

The Hybrid Model of Care projects are co-led by:

- Regional Health Authority
- PHSA Emergency Care BC (ECBC)
- PHSA Provincial Virtual Health (PVH)
- Ministry of Health

Services Authority

Virtual MRP: Hybrid Models of Care in Canada

Informant Interviews Across Canada

Provincial Health
Services Authority

“Virtual care is safe care” –
Dr. Puneet Kapur, Saskatchewan

(On the patient experience) Ensure patient culture is considered in decision making –
Dr. Todd Young, Newfoundland

“Design the service based on the problem you are trying to solve” –
Dr. Jan Sommers, Nova Scotia

(On the provider experience) Focus on relationship building and making them feel like a team -
Dr. John Pawlovich, British Columbia

Jurisdictional Scan – Hybrid Virtual MRP

Alberta Health Services: Virtual Emergency Physician

- 24/7 Virtual Physician support to 5 rural EDs
- Regional pool of AHS physicians
- Low tech: iPads, single EHR
- Fully virtual

British Columbia – Cariboo Memorial Hospital

- Local Hospital – Inpatient Unit
- Medium Tech: Teladoc Lite4 & e-peripherals
- Hybrid: Virtual Physician (Teladoc recruited) and In-person Physician

British Columbia - RCCbc VERRa

- Provincial - ED in rural/remote and small sites
- Low tech: Zoom on iPad
- RCCbc recruited pool of physicians
- On-Call Hybrid:
 - VERRa MRP CTAS 2-5
 - On-site Physician CTAS 1

British Columbia – Fraser Health Eagle Ridge Hospital

- Local hospital model
- Low Tech: MS Teams/cellphones
- On-site hybrid: Virtual hospitalist (from same hospital) –existing, stable inpatient and covers all "ward calls" during evening

Ontario: PGY5 virtual support

- Implemented in handful of small rural sites
- Low tech: Phone primarily
- On-site & On-call Hybrid: Senior resident is on-site, virtual supervisor is first on-call, physician within community is second on-call

Newfoundland & Labrador – Virtual ER Services

- Provincial pool of physicians + Teladoc physicians as back up
- Medium tech: WOW with Cisco and Teladoc Litev4 systems for virtual ER physician coverage
- Fully Virtual and transfers patients where appropriate to tertiary sites

Nova Scotia – Virtual EmergencyNS

- Yarmouth Regional Hospital- ED
- Medium tech: Maple platform with videoconferencing connected to iPad on-site
- On-Site Hybrid:
 - Virtual physician assigned to low acuity patient
 - On-site Physician high acuity patients

New Brunswick: Horizon Health Network

- Supports 2 Emergency Departments
- High Tech: Teladoc technology
- Hybrid: Virtual Physician (Teladoc recruited) and In-person physician

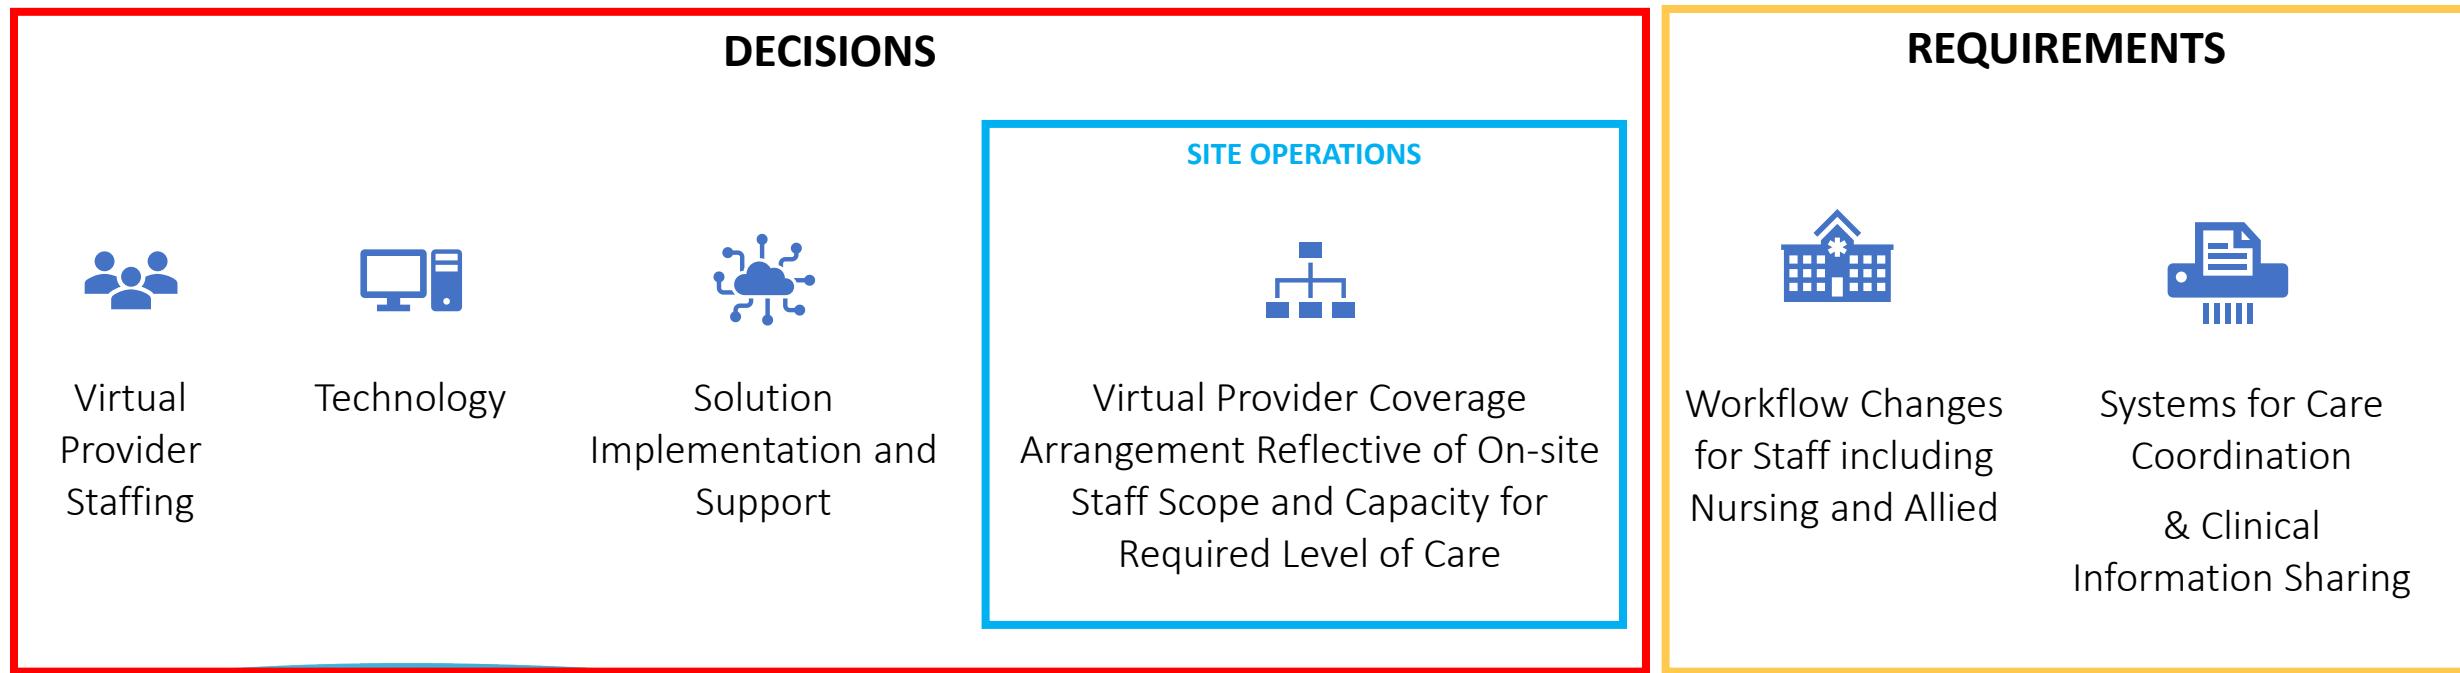

Saskatchewan – Central Virtual Physician Emergency Room (VPER)

- Provincial pool of physicians
- Low tech: Central home-grown video solution
- Fully Virtual, including higher acuity patients

Saskatchewan – Northern University of Sask. Remote Presence Robotics Program

- Northern remote communities
- High Tech: Teladoc technology
- Fully Virtual, including higher acuity patients

Components of Virtual Support for Hospitals Care Models

Service Model Definitions

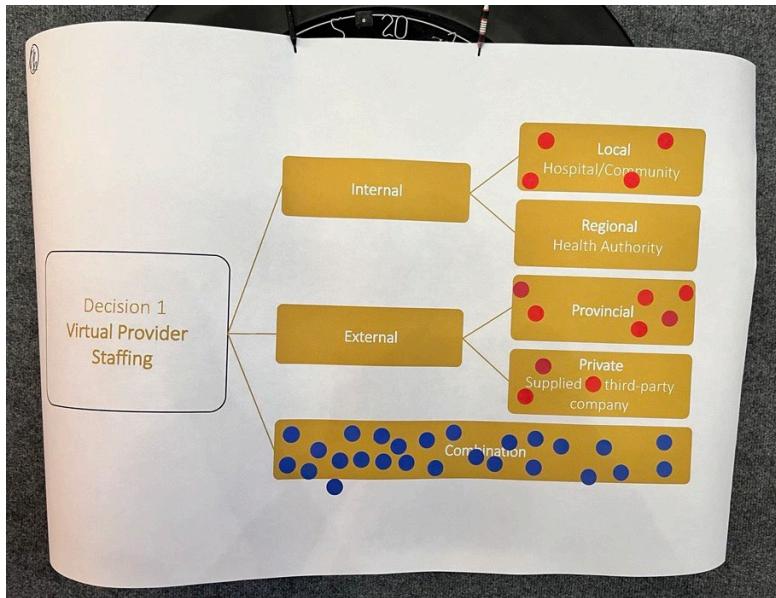

Service Model Description	Definition	Driver/Problem to be Solved	Staffing Support
Hybrid On-Site (workload augmentation)	<p>Virtual physician is working alongside an in-person physician and an in-person team.</p> <p>Workload is divided between providers based on care requirements.</p>	<ul style="list-style-type: none"> • Long waitlists • Patients left without being seen • Service interruptions due to reduced physician capacity onsite 	<ul style="list-style-type: none"> • Virtual operations team
Hybrid On-Call	<p>Virtual physician is working alongside an in-person care team, with back up from a community physician as needed.</p> <p><i>*Community or onsite resting physician back up required</i></p>	<ul style="list-style-type: none"> • Service interruptions due to physician shortage • Proactive overnight coverage alignment with Corridors of Care work 	<ul style="list-style-type: none"> • Virtual operations team • Resting in-person physician
Fully Virtual	<p>Virtual physician is the sole physician delivering care alongside an in-person team.</p> <p><i>* Last resort, requires airway protection and/or management escalation plan via nursing rural/remote cert, advanced care paramedic, respiratory therapist and/or ambulance bypass for high acuity.</i></p>	<ul style="list-style-type: none"> • Ad hoc daytime or overnight coverage needed due to physician sick calls/vacation 	<ul style="list-style-type: none"> • Virtual operations team • Onsite airway protection: <ul style="list-style-type: none"> • Upskill nurses and/or • Advanced care paramedic and/or • Respiratory therapist and/or • GP anesthetist and/or • And/or ambulance on bypass for high acuity

Regional Pilot: Cariboo Memorial Hospital

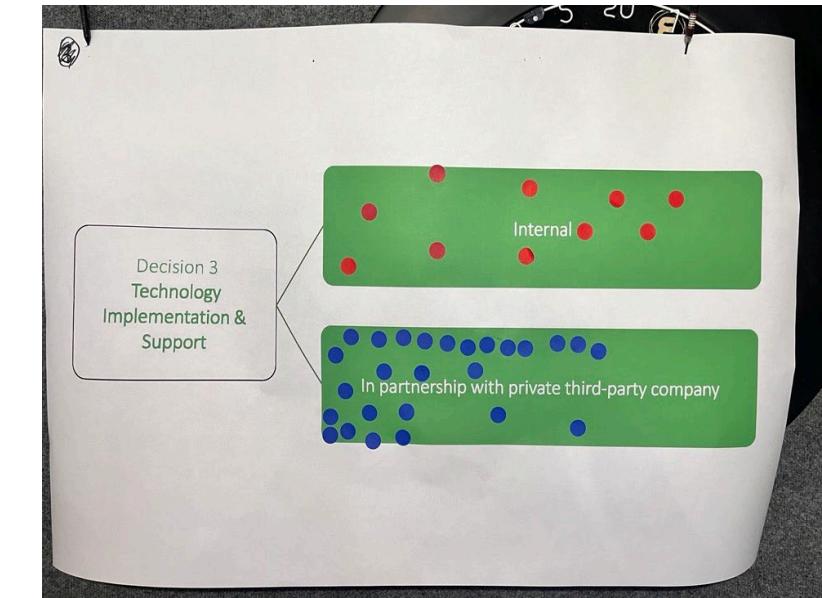

CMH Virtual MRP Model Development

Key Decision 1:
Combination of Internal and
External Virtual Provider Staffing

Key Decision 2:
Medium Technology Complexity

Key Decision 3:
Technology Implementation and
Support in Partnership with
Third-Party Company

Cariboo Memorial Hospital Pilot

Summary of Key Metrics (3 Month)

Higher admissions but occupancy trending downwards	No differences observed in key safety metrics	No difference in length of stay, readmission rates, or transfers back to the emergency department	Patient satisfaction is high	Provider satisfaction is high
Analysis: If the virtual model was not present, the hospital would be struggling to support patients	Analysis: Virtual care is safe care, with appropriate escalation pathways	Analysis: Virtual care maintains status quo for access and flow indicators	Analysis: Patients are pleased with service vs. transfer Recommendation: <ul style="list-style-type: none">• Consistent provider over multiple shifts• Ensure 1:1 time with virtual physician and patient• Adequate training for virtual providers	Analysis: Better solution vs. service interruptions Recommendation: Continue to improve workflow efficiencies to decrease extra workload on staff

Resource Prioritization

Provincial Approach to HMOC

Provincial Health
Services Authority

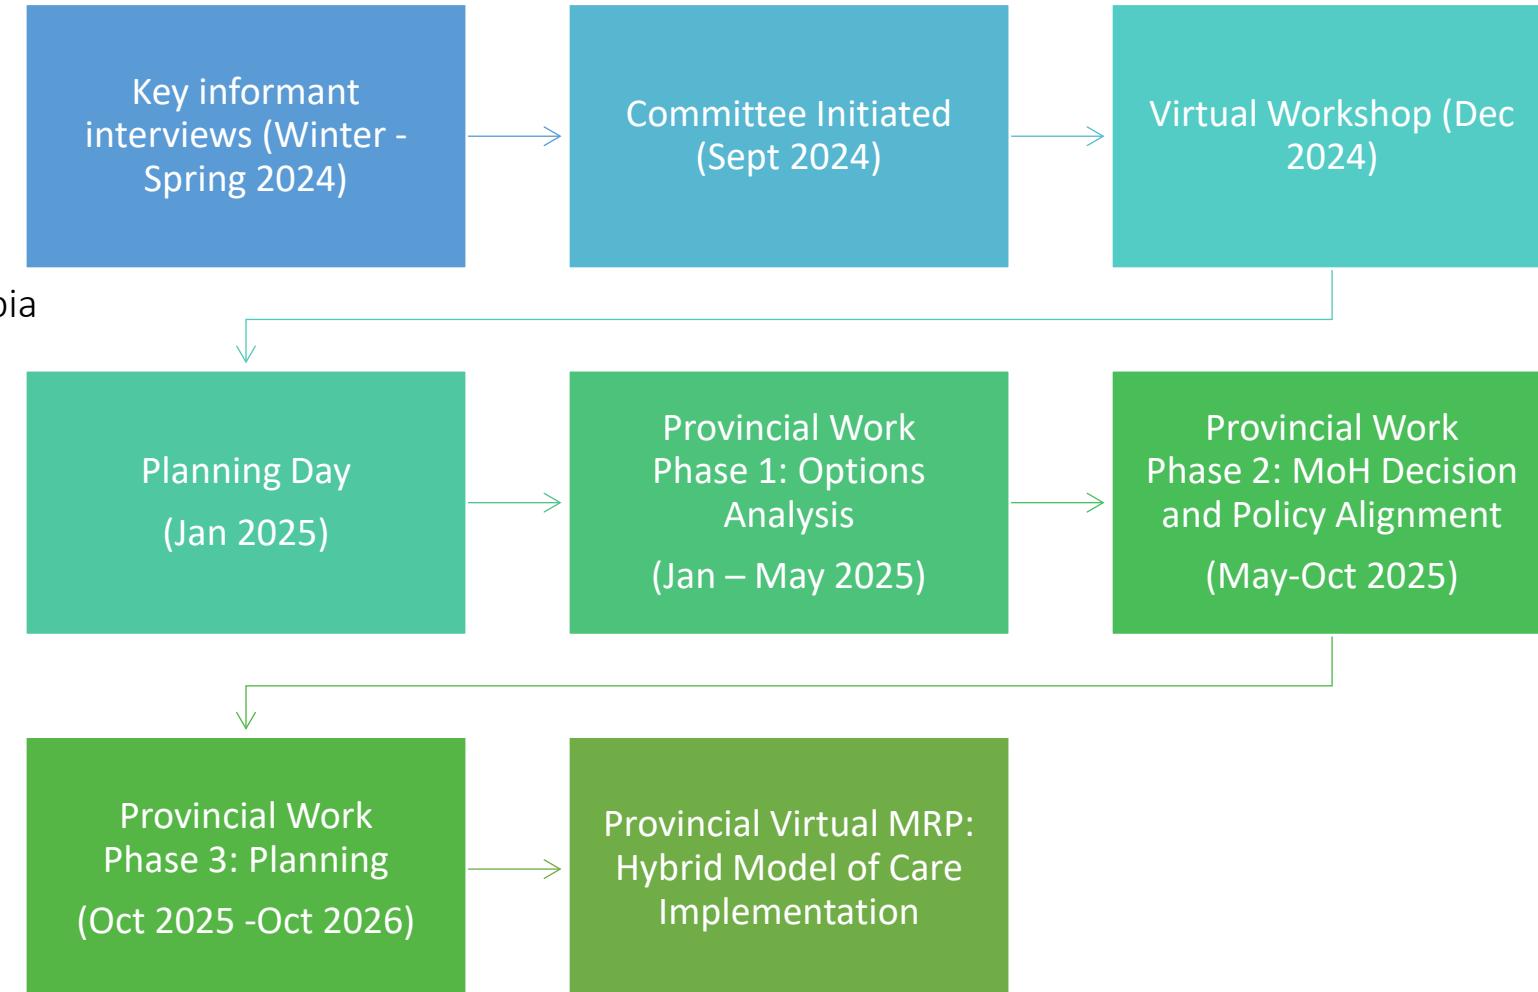

How we get there:

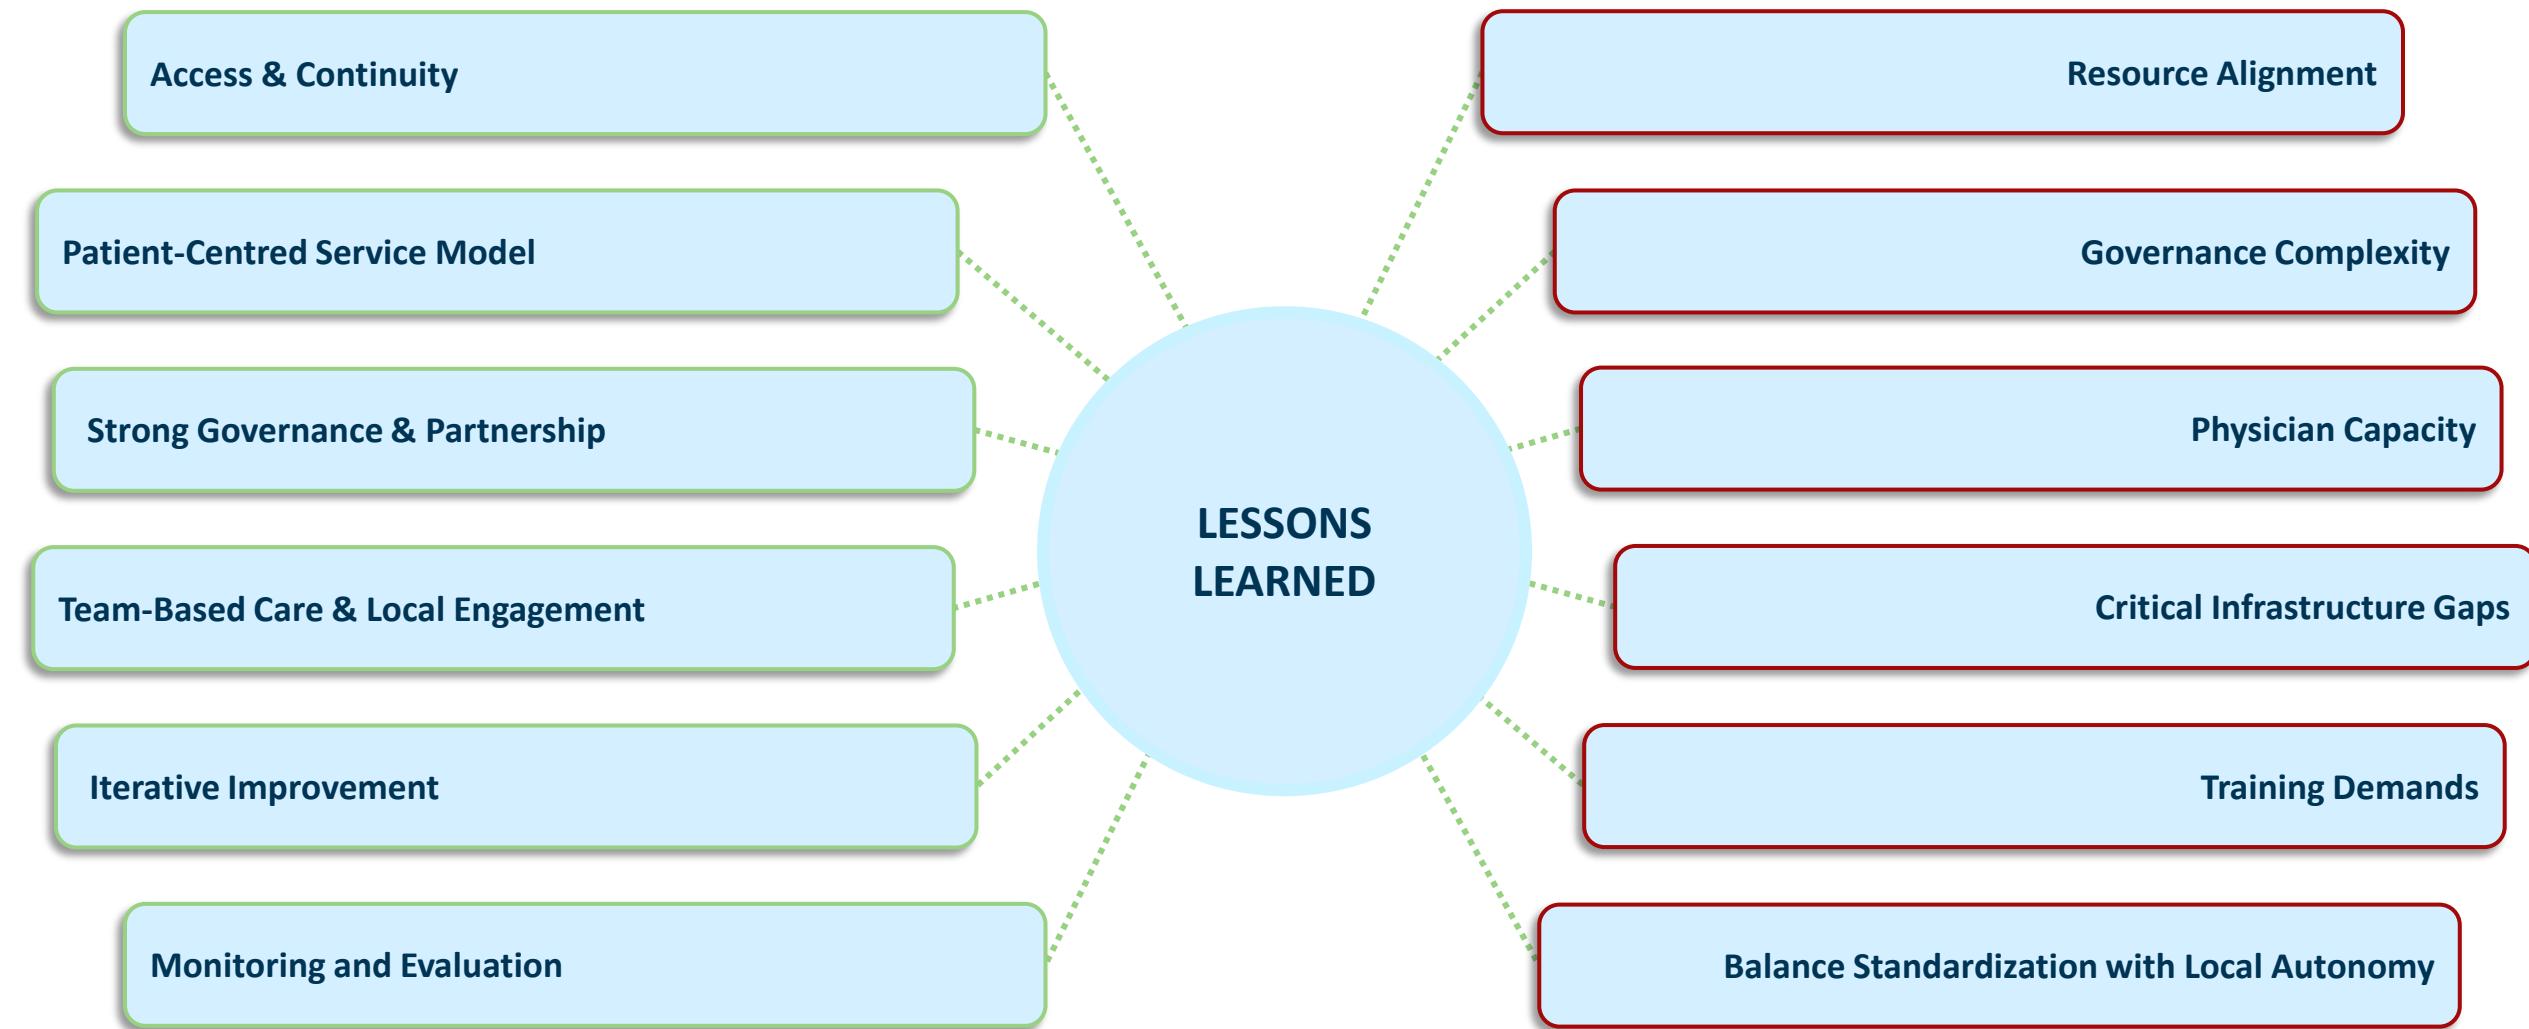

- Ministry mandate and direction on emergency service models of care and where virtual care augmentation is endorsed
- Implement provincial *HMOC guidelines and operational playbook* for provincial coordination, best practice standards, and implementation resources
- Develop *resource prioritization mechanism* to track and triage requests (optimize our limited physician resources and funding available)
- Develop consistent *training & education* for virtual providers and on-site staff
- Ensure provincial *monitoring, reporting, and evaluation* for quality and patient safety
- Build a provincial *sustainable* operational model
